“Worry-free”, confidently end old roofing problems with SCG Roof Renovation. A one-stop old roof renovation by SCG.

- Top Up Roof innovation, exclusive copyright by SCG, specializes in renovating old roofs and persistent leakage in townhomes. End chronic townhome roof leakages by adding double protection to seal leaks. They are freshly installed without the trouble of removing the old roof. Thus, it reduces dust and doesn't affect neighborhood. Moreover, the safe process allows homeowners to carry on normal lives without having to relocate. The installation is completed on time with 1-year guarantee.
 - Service is available in Bangkok, Nonthaburi, Pathum Thani, Samut Prakan, and Samut Sakhon.

Terms and conditions

- A 2,000-baht on-site survey fee. The amount will be the service fee discount when clients decide to purchase the Top Up Roof by SCG Roof Renovation after the survey.
 - A drone is used in the survey for aerial views of the roof condition. With the technology, the analysis and cost estimate for the appropriate solution can be promptly delivered.
 - From the on-site survey, clients will receive an inspection report by SCG standard experts. The report includes the actual roof condition along with the problem analysis and root cause, solution guidelines, renovation cost, and estimated time.
- Service is limited to townhomes that are no higher than 3-stories.
- Service depends on the condition of the roof structure and site. This can only be confirmed after the on-site survey.
- Grand opening special promotion: “same village, duo deals, each house gets 5% discounts”. Townhome clients can invite neighbors in the same village with leak issues to consider on-site surveys and renovate with Top Up Roof by SCG Roof Renovation. After the survey, if two or more homes finalize on Top Up Roof, SCG Roof Renovation offers each home a 5% discount from the service fee.

"Worry-Free" from fading roof tiles problem

- **SCG Roof Tile, Celica Curve series:** The supreme manufacturing process with the firing at a high and certain temperature dissolves the color pigments into the tiles homogeneously. It accentuates the higher quality of color durability which causes the beautiful color and unfading roof tiles, as if the roof has not aged.
- **SCG Concrete Roof Tile, Prestige X-Shield series:** With X-Shield Technology, it increases the adherence of the molecules between the color base and the coating on a roof tile. This contributes to the product's better color durability along with the beautiful and long-lasting color, a threefold increase compared to the typical concrete roof tiles*. (*This is the comparison test of the SCG Concrete Roof Tile, Prestige, the new X-Shield formula and the old formula via the QUV Accelerated Weathering Tester (ASTM G154). SCG Technology Roof Design Center indicates that the new Prestige X-Shield series can better withstand environmental conditions by three times when compared to the old formula series.)
- **SCG Concrete Roof Tile, CPAC series:** Due to Double Coating Technology, the special surface coating formula, makes the colors of the roof tiles more shiny and long-lasting. As a result, the coating colors can be maintained longer beauty than the typical pantile concrete roof tiles**. (**This is the comparison test of the SCG Concrete Roof Tile, CPAC, the new Double Coating formula and the old formula via the QUV Accelerated Weathering Tester (ASTM G154). SCG Technology Roof Design Center indicates that the new CPAC Double Coating series can better withstand environmental conditions when compared to the old formula series.)

"Comfort Living" and modern home trends with SCG Lean-to Roof System.

There are two systems according to its applications.

- **SCG Lean-to Roof System, Prolon series:** A better selection for home. According to the fiber cement materials, this helps lessen noise during rainfall, alleviates heat, rust, or leaks that may occur if conventional metal sheets are used. This item is suitable for modern house style with lean-to roofs or home extensions. Moreover, they can be used for roofs that are sloped at a minimum of 8 degrees. The all-in-one solution offers fiber cement roof tiles, ridges, equipment, service, and SCG standard's new installation technique.
- **SCG Lean-to Roof System, Zilence Kool series:** An innovative modern roofing system with low slopes from metal sheet composite roof panels. It is superior for its heat resistance and soundproof technology by the **polystyrene foam insulator with highly efficient fire-retardant additives**. The service life is long, and it can be used with roofs that are **sloped at a minimum of 5 degrees**. Choose Zilence Kool Ventilation Set for comfort living and experience other services such as consultation, BOQ, and 1-year installation guarantee.
